Art Unit: 2828

#### **DETAILED ACTION**

## Response to Arguments

Applicant's arguments with respect to claims 13-14 and 16-24 have been considered but are moot in view of the new ground(s) of rejection.

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 13-14 and 16-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Marnier (US4746396) in view of Russian Article No 16, 1983. Marnier discloses a nonlinear optical crystal for generating ultraviolet light (col.4, l.1-52) and the solution growth with a flux of potassium chloride (KCl) (col.5, l.5). Marnier lacks the compound of K2Al2B2O7. Russian Article teaches the compound of K2Al2B2O7 in page 43. For the benefit of a more efficient nonlinear optical crystal, it would have been obvious to one having ordinary skill in the art at

Art Unit: 2828

the time the invention was made to provide Marnier the compound of K2Al2B2O7 as taught by Russian article.
